

XM satellite radio is a great thing. My wife and I truly enjoy listening whenever we go on trips when we are in a large city and on the road there. The traffic and weather reports are great! We have several favorite stations that we listen to anywhere we travel. Please know that it would not be right to take away our choice to listen to the quality and variety of radio we have with satellite radio. I urge you to reject the petition 04-160 in its entirety! Sincerely,
Steve Lampman
